INSTRUCTIONS

1. Choose any template on Microsoft word and customize it, into your personal biodata and the data must include: Your full name, Covenant university address (your hall name and room number), your course of study, covenant university email and write a bit about yourself.
2. Go to your covenant university email, click on the box shaped icon and click on Blogger the template which you've made should be posted on your blog.

THE PROCESS

About me

My name is Nsofor Chigoziri Joshua, I am a student of Covenant University. I'm currently studying Management and Information Systems in 100 level. I am familiar with Microsoft Word and other similar Microsoft technologies. I am knowledgeable in basic web technologies such as HTML, CSS and JavaScript. I also know a few frameworks like React and Vue. Aside from the frontend, I have quite a bit of experience on the backend. I am familiar with PHP – Laravel for API, Nodejs for API and a few Backend as a service frameworks. I'm also knowledgeable in devops. I can build and deploy docker containers comfortably and many other similar skills. My dream is to get a job in PayStack for my IT and then after my graduation. I wouldn't mind working for a US company as well. Thank you.
